## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Bajzath et al (6,144,644).

Consider claims 1 and 8, Bajzath et al teach method and device for logging information during a call completion process in an Internet call waiting environment (col. 2 lines 17-24) comprising the steps of: creating a service detail record; and assigning a value to a parameter of the service detail record (col. 4 lines 18-38; col. 7 lines 16-30).

Consider claims 2-7, Bajzath et al teach the claimed features (col. 7 lines 16-30).

Consider claim 9, Bajzath teach a device for accessing via a network a device for logging information during a call completion process in an Internet call waiting environment (col. 7 lines 6-15).

Consider claim 11, Bajzath et al teach the claimed feature (see Fig. 1).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bajzath et al (6,144,644) in view of Adan et al (2004/0218583).

Consider claim 10, Bajzath et al did not suggest whereby said network is a mobile network. However, Adan et al disclosed an ICW features used by both wireline and wireless networks (see Fig. 4B). Therefore, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to incorporate the teaching of Adan et al into view of Bajzath et al in order to provide the similar features in various type of network environment.

***Conclusion***
